Verum Ultimum 2021

"Art can be the bridge; it spans across divides, and is the shortest distance between opposing forces. This collection arrives as a pivotal and timely exhibit. It defines the transitional, the unknown, the dream state, the waiting, the recovery, and the journey state of being and is the ideal manifestation to describe the current state of transition. These 64 distinct works land you between the here and the there, on a moving train of fragmented scenes of light and movement.

Verum Ultimum invites you to take pause, to submerge in the coolest notes of blue, move toward the flames of warmth, and the glowing glints of gold. Let the elegant neutrals mark time within a percolating narrative and a full spectrum palette. This is one of Verum's most immersive exhibits to date and it alternates between stillness and a cacophony of explosive color.

The debut of the Liminal exhibition marks our moment of transition with piercing truth to distinguish the gallery's namesake."
